Total Nonfarm Industry Employment

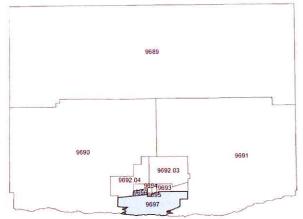

Areas of Substantial Unemployment

- Unemployment rate of 6.5% or higher
- Population of at least
 10,000 based on Census
 Bureau estimates
- Have geography that is contiguous: touching in at least one point, be separated by a body of water such as river or lake or be directly across a body of water from one another

Buffalo County ASU (2014)

Buffalo County (Kearney)

Dawson County (Lexington)

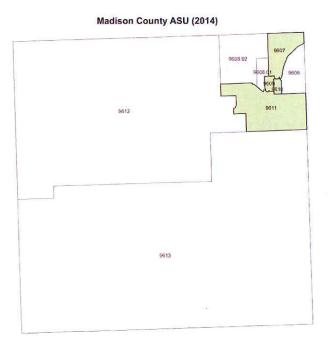

Scotts Bluff County ASU (2014)

Scotts Bluff County

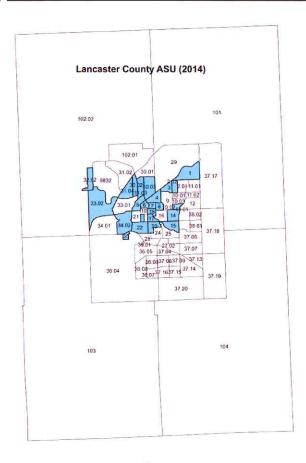

Dakota, Thurston, Burt, Washington and Dodge Counties

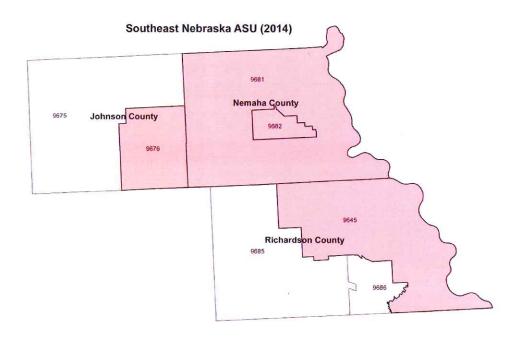

Madison County (Norfolk is in the northeast corner of the county)

Lancaster County

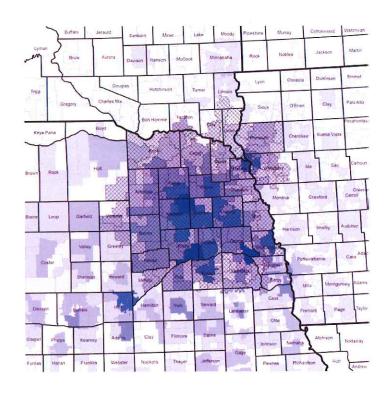

Johnson, Nemaha (Auburn), Richardson Counties

Northeast Nebraska Labor Shed Study

- Reason for survey: getting a better grasp on the available labor force in the area and commuting preferences
- Household survey conducted by UNL's Bureau of Sociological Research
- Partnered with DED and local economic development groups
- ☐ Sample Size: 12,000
- Currently, BOSR has received 2,578 surveys.
- Results expected by: early 2014

Results for 6 communities: Norfolk, Columbus, Wayne, West Point, South Sioux City and Fremont

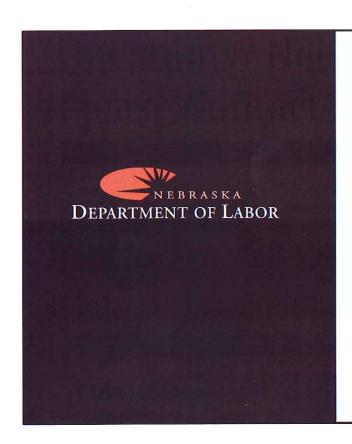

Data Warehouse Progress

- Unemployment Insurance Tax and Benefits, LMI's Quarterly Census of Employment and Wages loaded and working
- Occupational Employment Statistics and college data are in process
- Contractors will begin LMI phase 2 that includes NEworks data in January
- Northeast Community College is interested in an agreement. UNL, UNO, Metropolitan, Southeast and Central Community Colleges have signed agreements.

DEPARTMENT OF LABOR

 Buffett Foundation contacted LMI about a research project on scholarship recipients

what is reVISION?

Establishing a clear vision for Nebraska Career Education.

The purpose of reVISION is to:

- Align and support Career and Technical Education Systems with Nebraska's Economic Initiatives
- Develop Nebraska's talent pipelines for economic growth and workforce development
- Strengthen high school CTE programs to align with Nebraska postsecondary education entrance expectations
- Create a common language between local employers and education

The reVISION process will ensure that Nebraska students leave high school with the knowledge and skills required for employment in local/regional businesses, and it will also provide opportunities for students to experience a smoother transition from high school to postsecondary education. reVISION plays a key part in developing a talent pipeline for economic growth and workforce development in Nebraska.

Furthermore, the reVISION process introduces schools to the study "Growing Jobs, Industries, and Talent: A Competitive Advantage Assessment and Strategy for the State of Nebraska" commissioned by the Nebraska Department of Economic Development and the Nebraska Department of Labor in 2010. This report, more commonly referenced as the Battelle Study, highlights the need to further develop the industry clusters for Nebraska to remain economically viable and competitive. The reVISION process gives local

schools the opportunity to consider the results of the Battelle Study when determining which Career and Technical Education programs to offer. As a result of completing the reVISION process, the gap between education and economic development is bridged, and local schools are educating and training a qualified workforce that meets regional industry needs.

what is the timeline for TEVISION?

ONE YEAR

Part 1:

School's
Assessment
of Current
Career
Education
Programs

Part 2:

Meeting Facilitated by Nebraska Career Education Staff

Part 3:

Community Engagement Meeting

Part 4:

Meeting Facilitated by Nebraska Career Education Staff

Part 5:

Technical
Assistance
by Nebraska
Career
Education Staff
(as requested)

- Identify the courses, programs of study, postsecondary alignment, and extended learning opportunities currently available within the Career Education system.
- Identify the activities associated with the career guidance system
- Describe the need for bridging the gap between education and workforce/economic development
- Discuss the role education plays in training a qualified workforce that meets local and regional workforce/economic needs
- Identify local businesses and industries with high demand, high wage, and high skill jobs
- Analyze student achievement data, Perkins performance data, and student interest data
- Utilize a community engagement group to analyze the Career Education program while taking into account labor market data, high-growth industries in the area, and the knowledge base needed based for the high-growth industries
- Identify the knowledge and skills required for jobs in the local and/or regional economy
- Identify potential new (or revised)
 Career Education Program(s) of Study and course offerings which could be offered within the career education program

- Report results of the community engagement meeting
- Identify potential gaps that exist in career education courses, programs of study, postsecondary alignment, and extended learning opportunities and develop short-term and long-term goals for addressing those gaps
- Identify the
 resources needed
 to implement the
 proposed new (or
 revised) Career
 Education Program(s) of Study
- Analyze current career guidance and exploration activities

- Develop an action plan which describes the changes that will be made to the Career Education Program as a result of the reVISION process
- Apply for a reVI-SION Innovation Grant that can be used to implement the action plan
